SYN-TAC GUARANTEE

The finest materials and workmanship have been used in manufacturing every SYN-TAC roll. It has been carefully inspected before leaving the factory and is guaranteed by us to be perfect. If found otherwise, please return it to your dealer at once. This warranty does not cover damage caused by misuse, negligent handling or alteration. Components supplied with rollers as bearings, bushings, clips, screws, etc, are warranted and will be replaced. Pamarco Global Graphics or any of its affiliates will not be held liable for any damage done by the cause of a roller or rollers, component or components failing to perform properly or improperly. PAMARCO GLOBAL GRAPHICS

EACH ROLL IS DESIGNED AND MANUFACTURED TO DO A SPECIFIC JOB.

Only the best rubber formulations are used on SYN-TAC rollers, with the proper ink and water affinity minimizing the time you need to get the proper ink-water balance on your press.

CHEMICALS FOR BETTER PRINTING AND LONGER LASTING ROLLERS

CARE chemicals are designed to work hand in hand with the high quality rubber formulations used on each SYN-TAC roller. CARE chemicals were developed specifically for use with SYN-TAC rollers. Since you invested in high quality SYN-TAC rollers for your press, you should only use CARE chemicals to preserve your investment.

PREMIUM BLANKETS

You're using the highest quality roller when you install SYN-TAC replacement rollers, and maintaining those rollers by using CARE chemicals. To complete your high quality print job you need high quality blankets. SYN-TAC offers only the best, so when you need blankets superior in fit, finish and durability, choose SYN-TAC premium blankets.

DEMAND THE VERY BEST.

CHOOSE SYN-TAC BLANKETS AND ROLLERS AND CARE CHEMICALS!

See page 13 for Crestline water unit rolls

HERE'S A TIP ... When you run a color job and have ink left over, save a sample of the printed color. Paste or tape it on the can of unused ink. It will give you a quick answer to the shade of the contents.

SUPER INKER for A.B. DICK, RYOBI or ITEK IMPROVES INK SYSTEM

DESIGNED FOR A.B. DICK MODELS 360, 375, 9800, & 385 RYOBI MODELS 2800, & 3200

The additional distributor rolls, besides giving better milling of the ink, reverse the direction of the jumbo oscillator. This lengthens the ink train and helps to evaporate any excess water. In addition, the long steady flow of ink helps to cover starvation streaks and delivers a fine, even film of ink to the plate. The press is not altered with gadget attachments. There is no drilling or tapping for additional screws or bolts.

Installation can be accomplished by a competent operator or serviceperson. Thereafter, it can be removed and replaced by simply removing rollers.

- PROVIDES MORE INK RESERVE
• PRODUCES A FINER LAY OF INK
• HELPS EVAPORATE EXCESS WATER
• USES LESS INK & WATER
• IS EASY TO INSTALL

MODEL 360 SUPER INKER NO. 36080 CONSISTS OF:

- 1 #360840 Jumbo Ink Oscillator
2 #36021 Ink Distributor (1 1/8" diameter)
2 #36022 Ink Distributor (1 1/4" diameter)
2 #35000 Distributor Roll Brackets

MODELS 375 & 9800 SUPER INKER NO. 37580 CONSISTS OF:

- 1 #375840 Jumbo Ink Oscillator
2 #37521 Ink Distributor (1 1/8" diameter)
2 #37522 Ink Distributor (1 1/4" diameter)
2 #35000 Distributor Roll Brackets

MODEL 385 SUPER INKER NO. 38580 CONSISTS OF:

- 1 #385840 Jumbo Ink Oscillator
2 #38520 Ink Distributor (1 1/8" diameter)
2 #38521 Ink Distributor (1 1/4" diameter)
2 #38000 Distributor Roll Brackets

MODEL 2800 SUPER INKER NO. 28080 CONSISTS OF:

- 1 #280840 Jumbo Ink Oscillator
2 #28020 Ink Distributor (1 1/4" diameter)
2 #28021 Ink Distributor (1 1/8" diameter)
2 #28000 Distributor Brackets

MODEL 3200 SUPER INKER NO. 32R80 CONSISTS OF:

- 1 #32R840 Jumbo Ink Oscillator
2 #32R20 Ink Distributor (1 11/32" diameter)
2 #32R21 Ink Distributor (1 5/32" diameter)
2 #28000 Distributor Brackets

NOTE Jumbo roll cannot be used without brackets and four distributor rolls.

GHOST CHASER

the INK RIDER OSCILLATOR for CHIEF 15 & 17

This GHOST CHASER roll adds additional oscillation where it is needed, **directly on the ink form rolls!** By quickly replacing ink-starved areas, due to solids or heavy type, such images will not ghost into tint areas or halftones. It will give finer ink coverage with less ink and water.

NO PRESS ALTERATION, DRILLING or TAPPING

The above oscillating hard rubber roll replaced EITHER or BOTH of the small soft rubber idler rolls that ride on the ink form rolls shown in the schematic drawing on page 10 as rollers "J". After installation and adjustment, they can easily be removed for cleaning and lubricating. Each roll has a grease fitting.

This oscillator has an exclusive feature of securely locking in place, which eliminates end play or vibrations.

ORDER #150860 for CHIEF 15
or #170860 for CHIEF 17

• The ink train soft rubber roller kit includes these rolls

HERE'S A TIP ... Rest your **SYN-TAC** blanket often. Keep spare **SYN-TAC** blankets on hand. If the surface is not cut or broken but there are low spots, try soaking the blanket overnight in water. Hang it up for a thorough drying before using it again. The low spots are gone.

* Bushings are NOT included.

CARE CHEMICAL TIP:

Here is a safe and easy way to remove calcium carbonate glaze from your rollers:

Wash all ink from the rollers with **X75-122** followed with **X75-123**. Disengage the clean-up attachment and pour **X75-111** deglazer over the rollers. Let the press run for five to ten minutes, adding more of the **X75-111** as needed. Engage the clean-up attachment to remove all of the **X75-111**.

Remember: the amount of **X75-111** needed will depend on the amount of alkaline build-up. The alkaline will neutralize the **X75-111** as the calcium carbonate is dissolved.

CARE CHEMICAL TIP:

Many press users don't wash up the press at the end of the day. This permits dust and dirt to accumulate in the inking system and invites many problems. It's not good roller care either.

If it is policy not to wash up at night, it is advisable to give the press a good cleaning on Friday. Wash the ink off your rollers with a good wash like **X75-122** and **X75-123**. Once the ink has been removed apply a good deglazer like **X75-111**, and rinse with **X75-123**. Your press rollers will be clean and can rest over the weekend.

Good housekeeping pays off in better production and higher quality with less down time and fewer service calls. Ink and water balance is easier to maintain if the rollers are free of glaze. Hickeys are less of a problem because dried ink particles and dirt do not accumulate in the inking system.

12055-S	R	WATER FOUNTAIN (smooth)	—	1 ³ / ₈	10 ³ / ₈	11

A **smooth** aluminum fountain roll will give better water control and will be easier to clean. If your smooth roll picks up ink, clean it with plate cleaner or straight etch. Wipe it dry, apply plate gum, and wipe it dry again. Since the fountain solution dissolves the thin film of gum, the fountain roll is now ready to use.

Never use any solvent to clean a 3M sleeve. If cleaning is necessary—though it's better to use a new sleeve—use only plain water or fountain solution.

See page 53 for paper feeder and blanket cleaner rolls.
See page 72 for Townsend T-51 color head rolls.

ALL WATER SYSTEMS ARE NOT THE SAME! CRESTLINE®, TEMPEST®, POWDER PRO® SIMPLY THE BEST

EACH CRESTLINE IS DESIGNED AND MANUFACTURED TO CARRY A SPECIFIC AMOUNT OF WATER TO THE PLATE.

Only the best components are used in CRESTLINE units. This minimizes the time you need to get the proper ink-water balance.

EVERY TEMPEST IS DESIGNED USING THERMISTOR TECHNOLOGY

TEMPEST hot air dryers use ceramic coated semi conductors as their heat source instead of inferred bulbs. That's why the TEMPEST hot air dryer will never ignite your paper. As each sheet of paper passes by the TEMPEST it floats through a layer of heated air which accelerates ink drying.

THE POWDER PRO METERS EXACT AMOUNTS OF POWDER TO EACH SHEET

As the powder is fluffed up in the POWDER PRO jar it is metered through a manifold. Then by even air pressure the POWDER PRO delivers a specific amount of powder to the sheet This eliminates powder clumping and over or under spraying as the volume of powder changes in the jar.

DEMAND THE VERY BEST. CHOOSE CRESTLINE, TEMPEST AND POWDER PRO as your next press accessory.

MANUFACTURER’S LIMITED WARRANTY

Crestline® and Altra Series®

Pamarco Global Graphics warrants to Owner that all parts and material used in the construction of the Crestline or Altra Series Dampener are free from any manufacturing defects. Pamarco shall repair or replace all defective parts and material (except rollers) for two (2) years from the date of installation. This limited warranty shall not cover labor, service and/or installation.

Powder Pro® Spraying System

Pamarco Global Graphics warrants to Owner that all parts and material used in the construction of the PowderPro sprayer are free from any manufacturing defects. Pamarco shall repair or replace all defective components (except pumps) for two (2) years from the date of installation. Pamarco shall repair or replace all defective pumps for a period of 1 year following date of installation. This limited warranty shall not cover labor, service and/or installation.

Tempest® Hot Air Drying System

Pamarco Global Graphics warrants to Owner that all parts and material used in the construction of the Tempest dryer are free from any manufacturing defect. Pamarco shall repair or replace with equal or like product all defective parts and materials for a period of one (1) year from date of installation. This limited warranty shall not cover labor, service and/or installation.
