Model
GM520

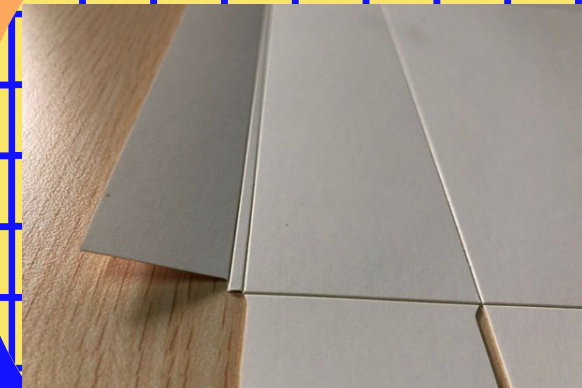

V SLOT

Jindal Offset India Pvt. Ltd.

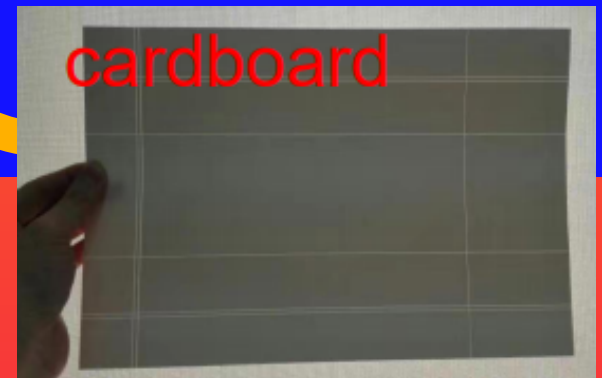

FEATURES

- Add more grooving lines on the platform.
- The work table is made of aluminium plate to improve the precision of groove.
- Humanized fixed adjustment device makes the adjustment faster and more accurate.
- Balancing block device can be adjusted, and the precision of groove can reach 0.05mm.
- The platen device replaces the traditional manual cardboard pressing, so it is easier to open the groove.
- Use high-precision guide rail to ensure the balance of the knife.
