

JINDAL OFFSET INDIA PVT. LTD.

Perfect Binder Machine, BM600LP

FEATURE

- **Adopt a frame structure** :not easy to deform after long-term use .Improve the accuracy
- **Industrial-grade variable frequency control system**:have professional R&D team,use frequency conversion technology and hover technology
- **Double-mode automatic binding design**:Auto and fast mode, One-click switching, increased the efficiency by 50%
- **Digital display for spine**:With memory function, precisely control the clamp height,make better formation effect of the spine
- **7-inch intelligent touch screen**:Simple operation,including intelligent detection, photoelectric induction, and fault code prompt function
- **18-tooth disk milling cutter and small milling cutter**: High quality tungsten steel material, strong power motor, make even grooves , very firm.
- **Independent side glue and base glue with rolling wheel structure**:accurately control the temp,make firmer binding and better molding.
- **Double guide rail variable speed operation**:High-speed frequency conversion hover technology, running sound is light
- **Siphonic fan dust collection design**:The paper scraps are absorbed thoroughly, reducing the mixture of glue and paper scraps

specification

Model:	Display: 7-inch touch screen
Max. binding length: 420mm	Max. binding thickness: 60mm
Glue melt time: ≤35min	Speed: 400books/hour
Milling cutter: 18-tooth	Book spine: digital display
Type: Manual+Auto+Fast	Power: 220V/2100W
Machine size: 1550*630*960mm	Machine weight: 280KG
